

BARTŁOMIEJ SZAJNA

Front-end Developer

It started accidentally. During my very first lesson of programming at the university I have unwittingly generated an infinite loop which was printing "I am coding!" to the console. Apparently I had no other choice than to code since then, not that I wanted - I just can not figure out how to get out of this loop yet :)

I am eager to be engaged and contribute to your company's growth. Let us talk about how I can help in creating amazing projects and achieving your goals.

EDUCATION

Bachelor of Science

2014-2018

Automatics and Robotics

University of Science and Technology in Cracow

PREVIOUS JOBS

STOREKEEPER

DROGERIA PIGMENT S.C.

06.2019 - 12.2019

This job let me learn how to cooperate with people, work in the team. It allowed me to profoundly develop my soft skills as communication with my colleagues was fundamental part of daily work routine.

DATABASE OPERATOR

IGE+XAO POLAND SP. Z.O.O.

02.2018 - 06.2018

I was mostly responsible for designing and modifying diagram symbols of industrial equipment for SEE Electrical. I have significantly improved skill of reading english documentation which was essential in that position. After couple of months I became experienced enough to take care of new employees training, keep an eye on them within very first weeks and be ready to help if need be.

MORE ABOUT ME

I have deep admiration for hard work, commitment and diligence. I greatly believe in mutual respect and equality. I am all into reading english books, especially about self development and human relations. I simply love drawing - when doing so, you would not draw my attention to anything else. I constantly learn something new - whether it is web development, playing the guitar or skating. I am also keen on listening to podcasts.
